We need as many supporters as we can to **#SwapTogether** for good.

The farmers and workers behind our food are already living with the worst effects of the climate crisis. But with a fairer income and the right legal protections in place, we know Fairtrade farmers have the skills, expertise and passion to take on climate change.

'We farm from the heart, and we love growing. With the love I have for my land, I don't see myself working anywhere else.' Jaime Alberto García Flórez, who grows cocoa and Fairtrade coffee on his farm in Colombia.

To learn more and gain some inspiration on how else you could celebrate **Great Big Green Week** this year sign up to join our upcoming climate catch-up webinar.
